Junior DevOps Engineer

Description

A customer is a healthcare IT security company. It provides healthcare companies with a platform that addresses critical compliance and security challenges and helps improve providers' productivity. The goal is to create a SaaS product from the ground up in a public cloud framework.

Responsibilities

- Collaborate, maintain, and monitor AWS Infrastructure.
- Participate in Production deployments and infrastructure changes such as quarterly patching and SSL cert rotations.
- Participate in the Automation of IaC and deployment tasks using Ansible.
- Participate in the security of the Cloud/SaaS hosting environments and processes.
- Collaborate with engineering and business stakeholders to support the delivery of regular software updates while maintaining a high level of availability.
- Participate in on-call rotations, ensuring quick and effective system management.

Qualifications

- 1+ years of experience supporting Production workloads in AWS.
- Working knowledge of server, networking, operating system, database, application performance management, monitoring, and alerting systems, load balancing, and security systems.
- Basic experience with AWS Technologies, focusing on EC2, RDS, DynamoDB, VPC, and Route 53.
- Basic experience using Bash and Python.
- Strong communication skills.
- Basic experience with Linux.
- Basic experience creating automation via Ansible.
- Understanding of Git and GitOps.

Job Benefits

- **Exciting Projects:** Work on market-defining products using the latest technologies.
- **Collaborative Environment:** Expand your skills by collaborating with a diverse team in an open, laid-back environment.
- **Work-Life Balance:** Flexible work schedules to ensure a balance between professional and personal life.
- **Professional Development:** English classes, professional certifications, and technical and soft skill training.
- **Excellent Benefits:** Competitive salaries, family medical insurance, extended paternity leave, annual performance bonuses, and referral bonuses.

Skills

- Amazon Relational Database Service (RDS)
